

Assignment - 1 (20 marks)

Before Dec. 20, 2020 Midnight, submit two files to Stream. Document should have your name and ID and Zipped folder file should have your HTML, CSS, JavaScript and any related files.

Develop a personal website. You will be marked on the following:

1	Project Proposal (one page only): · Site title · Development roles · Need · Rationale or focus · Main elements outline · Content · Target audience · Design considerations · Limiting factors...	2 marks
2	3 Web Pages	3 marks
3	Movement through at least 3 html pages	1 mark
4	Intuitive navigation of your website.	1 mark
5	Usage of Images. [To use pictures; try to use own first; not possible try free images from the web (please add references). www.Pixabay.com seems a good option.]	1 mark
6	List of references with links to the sources from where you took help.	1 mark
7	Correct usage of all the HTML elements (Use the markup validation tool to check pages in the website. https://validator.w3.org/#validate_by_input · Add the screen capture for the pages to the assignment document, these must be clear images so we can determine if the pages validated correctly.)	4 marks
8	Correct usage of CSS for all the HTML elements/ids/classes)	3 marks
9	JavaScript usage	3 marks
10	Comments for not-very-obvious properties of elements/classes/ids in CSS, blocks in HTML (e.g. section, aside etc.) and functions in JavaScript e.g. (Input to the function, Return from the function, description of the function etc.)	1 mark

1 Bonus mark: Creativity / Aesthetics (which can make up for any other parts in your assignment where you might have lost marks)

1

Hint to start

First concentrate on the content you want to include; then layout as neatly as possible and then see if your web page aesthetics could be improved; webpages images, graphics can be simple yet beautiful.

Manage your website within 4 days and then see if you can improve before submission. If you are stuck; don't panic; stop looking at the screen; relax, and then come back to your work with fresh mind. Try to google your issues.
